YES

Date of health cert

Monday, March 8, 2021

Time of health cert

9:00 AM

HEALTH COMMENTS

The CEO has an identified OVERBITE. This means her front teeth extend past the expected scissor bite. And OVERBITE is typically not eligible for repair unless it affects the ability to eat or other activities of daily living. When scoring the OVERBITE, 1 being the least severe and 5 being the most severe in regards to visibility of the overbite. For this puppy the OVERBITE is about a grade 2/5 without incident to eating. In our opinion puppy should not have any significant health issues over her lifetime

MOVEMENT

GAIT

GAIT	STABLE MOVEMENT

CLOSING THOUGHTS

CLOSING THOUGHTS ON THIS PUPPY

The CEO has gone through typical puppy development stages. She was a little behind the curve around 3-5 weeks but is now meeting all expectations. She will do good in any home and will have a smooth transition. She blends in with the pack now and enjoys socializing with dogs and humans. The OVERBITE is a genetic defect noticed with the BREEDER appears to be stable and does not affect her eating or growth. Any prospective families can speak with their vet prior to selecting this puppy to be well informed on OVERBITES in animals.
